

Environmental Protection Agency Internet Information

EPA Region 2

While Freedom of Information Act (FOIA) requests will be honored by directly writing to Region 2, EPA provides an increasing amount of environmental media information, and other Regional activities via Internet at <http://www.epa.gov>.

Region 2 has provided a FOIA Web site <http://www.epa.gov/region02/foia/> with several online databases from which the environmental information can be retrieved.

- **"Frequently FOIAed Files"** Web site <http://www.epa.gov/region02/foia/fff.htm> covers RCRA and many other media Programs. Through this Web site, you can learn about each media Program, associated databases, and special points of interest. In particular, the ability to "directly download" all of the most commonly requested Region 2 Export Files (.xls) and Reports (.pdf) - all compressed for quicker downloading.

EPA Region 2 has established a **list of contaminated facilities** that are a high priority for cleanup in New York, New Jersey, Puerto Rico and the U.S. Virgin Islands. You can view each facility fact sheet at <http://www.epa.gov/region02/cleanup/sites/>

EPA- Headquarters

- **Envirofacts Data Warehouse** Web site <http://www.epa.gov/enviro/index.html> is a one-stop source to the environmental information. This Web site provides access to several EPA databases with information about environmental activities that may affect air, water and land anywhere in the United States.
- **"My Environment"** Web site <http://www.epa.gov/myenvironment> is a powerful tool that provides a wide range of federal, state and local information about environmental conditions and futures in an area of your choice.
- **The Enforcement and Compliance History Online (ECHO)** Web site <http://www.epa.gov/echo/> provides a list of all inspections and enforcement under most of the environmental statutes.
- **Right-To-Know Network (RTK Net)**, a non-EPA Web site <http://www.rtknet.org/> on-line query engine provides free access to numerous databases and resources on environment.
- **National Biennial RCRA Hazardous Waste Report** Web site <http://www.epa.gov/epaoswer/hazwaste/data/biennialreport/index.htm> provides documents and data on hazardous waste reports.
- **Conditionally Exempt Small Quantity Generators** Web site <http://www.epa.gov/osw/hazard/generation/cesgg.htm> provides information on Conditionally Exempt Small Quantity Generators.

OF
HAZARDOUS WASTE ACTIVITY**

01/31/2002

This is to acknowledge that you have filed a **Notification of Hazardous Waste Activity** for the installation located at the address shown in the box below to comply with Section 3010 of the Resource Conservation and Recovery Act (RCRA). Your EPA Identification Number for that installation appears in the box below. The EPA Identification Number must be included on all shipping manifests for transporting hazardous wastes; on all Annual Reports that generators of hazardous waste, and owners and operators of hazardous waste treatment, storage and disposal facilities must file with EPA; on all applications for a Federal Hazardous Waste Permit; and other hazardous waste management reports and documents required under Subtitle C of RCRA.

Game Plan for Online Success

Targeted Websites Boost Sales, Profile, Client Contact

My first website was built almost 10 years ago. For its time, it was innovative and informative. Over the years, I learned that doing business online isn't magical. It takes marketing, planning, and work.

I experienced the normal growing pains of attempting online sales with complicated, pricey software. It did nothing but delay my sales and allow my clients to send every friend and relative to the site to view and possibly take screen shots of their favorite portraits.

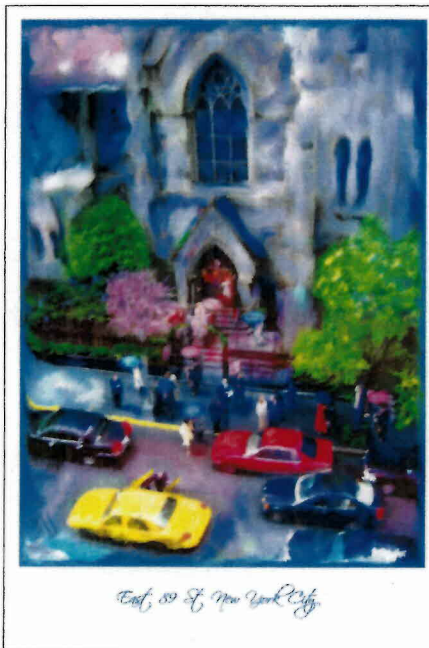

After a great deal of evaluation, I decided that online sales were not for me—or my clients. Actually, by not purchasing anything online, my clients decided it for me.

Today, I market my work on the Internet with a game plan. Instead of one all-inclusive website, we have multiple websites to draw different customers, each one with its own personality and content. Here is an overview:

1. At www.marilynsholin.com, portrait clients can learn more about having their portrait created. All the information they need is presented in a simple format with the home page having a little visual pizzazz with a quick Flash opening. There are galleries, information on clothing, hair and makeup for portraits, and just enough biography and personal information to keep my clients involved.

We don't process any online sales on the client portraits website. Once they place their orders, I post a passworded PDF file on a secured link. The PDF has only the images the client has purchased and is only posted for a limited time. The link address is emailed to the client, who may pass it around to friends and family. In this system, the order is already placed and there is no delay in the sale process.

2. Our first information and tutorial site for professional photographers and artists, www.msholinprosales.com, was also our first site where sales could be processed through Paypal.com and credit cards. It is a secured site, which is necessary for any online sales. Shirley Lund (www.lundandlund.com) has built all

our websites and taught me how to manage the back end, so I can update and change text and photos myself. When it comes to building and securing a site with some bells and whistles, use a professional Web designer.

3. Our newest and most complex site, www.marilynsholinfineart.com, is a full shopping site where my photo paintings are sold as posters, prints, and gift items. This site is also where we plan to host all art for stock sales and commercial purposes.

4. marilyn.blogsome.com, our blog, is where I interject personal moments, successes, restaurant reviews, comments, and stories of our travels, in a personal and friendly tone. The blog is probably the most fun to work on, to put content on. It surprises me how many people visit over and over.

5. Lastly, there's www.digitalpaintingforum.com, which I started as a forum about digital painting because I thought it would be a great place to have all the information in one place. Little did I know that in one year it would generate 2,000 members and 20,000 posts. It is still hosted on my website. New content is added often to keep it interesting and up to date.

All these sites combine to create an online personality that gives my name credibility and shows a sound basis for business and my commitment to the industry and my clients.

Each site has its own newsletter, which we manage with Constant Contact (www.constantcontact.com). Their fees are reasonable and we can send out a message, a newsletter, a postcard or a reminder in a few minutes using templates and letting them do the bulk mailing. We get fantastic details on who clicks on what link.

When we send out a mailing about family portraits to our clients with some links to our family portrait information online, I get a list of the email addresses that clicked on that link. It even shows what time they clicked and how many times they clicked on the link.

With this information, I develop a new-mailing list only of the clients who showed interest in family portraits. A new email is sent to them with an offer for portraits they can't resist.

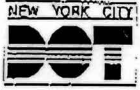

With Constant Contact as my marketing partner, we have been able to keep the websites separate and continue to track interest in each product we promote. Their monthly fee makes them the cheapest "employee" we have.

Another company I use for marketing to clients is Amazing Mail (www.amazingmail.com), which allows me to send personalized postcards with my own images directly from their website. This is a great marketing tool, which lets me send clients mailings with their own portraits from their last portrait sessions. Who wouldn't read the back of that postcard? I get my message printed, delivered, and read all from one website.

If I want to send a full-size, fold-over, printed greeting card, I use Card Store (www.cardstore.com). This site does the same thing as Amazing Mail, but sends a beautifully printed greeting card.

By using the power of the Internet, I have increased sales, saved money, and developed valuable new ways to communicate with clients and prospective clients. ♦

MARILYN SHOLIN (www.marilynsholinfineart.com), of Miami, Florida, is a Master Craftsman photographer and Corel Painter Master. Her artwork has been exhibited in galleries from California to Florida and is showcased in private collections. Sholin's workshop and event schedule can be found on her website.
